

AUSTRALIA'S SMARTEST SPRINKLER.

"NICE ONE NELSON"

Fully adjustable
Arc and Radius

Complete MP
unit fits into
existing mounts

Patented design
creates Higher
uniformity and
Lower flow rate

Inlet screen
reduces
maintenance

**Smart
Approved
WaterMark**

The MP Rotator is the first sprinkler to be awarded 'Smart Approved WaterMark' status by the Water Services Association of Australia.

The Irrigation Association of Australia, Nursery & Garden Industry Australia, Australian Water Association and the Water Services Association created the Smart Approved WaterMark to recognise innovative water saving irrigation technology.

The awarded MP Rotator reduces water usage by 35 to 50% – savings equivalent to changing existing systems to drip irrigation but at a fraction of the cost and without any disruption to the garden. It is equally suitable for retrofitting or installing into new irrigation systems providing the homeowner, commercial user or city council with the highest water efficiency system available in the world.

The MP Rotator easily retrofits into existing spray head and shrub head irrigation systems instantly converting high application rate spray heads to low rate Rotator systems reducing application and flow rates by 50 to 80%. The effect is the same as water-saving shower heads... less water usage.

So, now the experts agree, the amazing MP Rotator is the smart way to get better coverage and with less water – nice one Nelson.
