 8B Locking Yellow Tuff-Top
 8C Purple Non-Potable Locking Tuff-Top
 9 Pin
 10 E-Clip
 11 Lid Spring

Items sold separately :
 13 Body

QCV Trouble Shooting Tips
 All valves should be installed with gravel sumps surrounding and under the valve for adequate drainage.

1. Water leaks around valve:
 - A. Check QCV key part number to make sure it is compatible with the QCV.
 - B. Check U-Cup seal (#12) for wear or damage. Replace as necessary.
 - C. Check key for wear, pits, cracks, etc.
 - D. Check inside valve for obstructions: rocks, twigs, leaves, etc.
2. Valve leaks constantly:
 - A. Check valve for obstructions.
 - B. Check rubber seat (#4) for wear or damage. Replace as necessary.
 - C. Check installation. Make sure valve is not cross-threaded onto riser and all other connections are water-tight. Use teflon tape on all threads (#7). Never use teflon paste near valves.

	QCV Model #		
	3/4"	1"	1-1/2"
Brass Cover	QB3BL07, QB35BL07	QB5BL10	QB7BL15
